

Amazing Interlace

Interlace was used as a form of decoration on carved stones and also on manuscripts. Many of the stones you see in Govan Old church use interlace as a pattern or as part of a creature such as a snake.

Try this...

Follow the trail from start to finish by going under and over the interlace. There are two different strands of interlace, so chose one to follow.

Add a head or a tail to make the pattern into a snake.

Colour in the interlace to complete your design.
